Grant Activity

Grant Activity - administrative/coordination activities

Description	This activity will be for the administration of the grant, meetings with partners, and required reporting and documentation in eLINK. The committee plans to meet 3 - 4 times each year regarding implementation of the grant and ultimately determine new methods of invasive weed target areas, treatment and record keeping of those decisions. After treatment of these invasive weed areas each partner will document areas, methods of treatment, time and equipment involved. After inspection we will report results of that treatment to the eLINK reporting entity. this activity also includes the administrative time of each partner to administer their staff.

Description

This activity includes the on- the -ground implementation activities for weed management. Technical staff from the partners will be in the field identifying (field research), GPSing, and treating invasive weed areas . All the individuals in the treatment phase of this grant have expertise and knowledge of the Big Stone and Traverse Counties landscapes. The CWMA will be hiring an intern to assist with identifying, mapping and treating areas that are newly discovered and reported, or as a follow-up from problem areas as defined from previous grant interns and partner records. This activity is for reporting the field wages for the intern. Partner involvement will be to identify areas of targeted weed infestation and treat these areas with recommended chemical. This activity will also serve as a place holder for individual landowner cost share contracts for invasive weed treatment. Each landowner under contract will be cost shared at 50% of the chemical and treatment by the CWMA personnel.

In the original Application Budget for this grant, this activity was set up as Technical and Engineering Assistance. After discussion with David Sill and Dan Shaw on 3/18/2014, this entire activity category has been changed to Special Projects, to conform to the activity category specifications for the CWMA grant.
